

TRAVIS STOCKELMAN

Full-Stack Development | Web Development | Data Analysis

ABOUT ME

Detail-oriented professional transitioning into Full Stack Development with a strong foundation in Python and SQL. Drawing on a strong background in Generative AI, data verification, and personnel leadership, I bring a disciplined approach to code quality, data integrity, and technical troubleshooting.

EXPERIENCE

AI GENERALIST (CONTRACTOR) — OUTLIER AI

November 2025-Present

- Supported AI research and model-training by providing high-quality data annotation to improve AI model accuracy.
- Reviewed and evaluated AI system outputs for clarity, correctness, reasoning quality, and policy alignment, providing structured feedback to help improve model behavior.
- Adapted quickly to rapidly evolving tools, project scopes, and guidelines, maintaining high accuracy and reliability in a fast-paced environment.
- Trained AI models in pattern recognition and image editing, contributing to improved model reliability and consistency.
- Applied strong critical-thinking and analytical skills to improve data quality and model behavior across diverse domains.
- Functioned as a flexible generalist, filling various roles as needed for various projects.

FOUNDER & EDITOR—NAZARENE CAFFEINE

May 2020-Present

- Produced and audited a library of 200+ long-form assets, achieving 250,000+ interactions by adhering to strict stylistic and structural guidelines for both the content of each article and their underlying HTML and CSS code.
- Engineered multi-year educational frameworks and structured datasets, requiring high-level logical mapping and consistency across large-scale content projects.
- Leveraged SEO metadata, data analysis, and performance analytics to optimize content reach, demonstrating proficiency in data-driven decision-making and digital toolsets.

EDUCATION

University of the People

Certificate in Data Analysis (In Progress)

Wesley Biblical Seminary

M.Div. Biblical Languages (In Progress)

Nazarene Bible College (2020)

B.A. Min. Bible & Theology | Minor in Pastoral Ministries

Chattahoochee Valley Community College (2011)

A.A.S. Fire Science | Certificate in Emergency Medical Services

SKILLS

Technical Skills:

Python
SQL (PostgreSQL/SQLite3)
HTML5 / CSS3 (WCAG Standards)
Linux(Ubuntu/WSL)
Version Control (Git/GitHub)
Bash Scripting

Specialized:

Data Annotation & Verification
Quality Assurance
Technical Troubleshooting
Generative AI
Technical Writing

SENIOR PASTOR—GEORGETOWN CHURCH OF THE NAZARENE

August 2023-August 2025

- Coordinated daily operations and scheduling for a 40-member organization, managing cross-functional tasks and program development with high attention to detail.
 - Audited organizational structures to ensure alignment with governing "Manual" guidelines; reinstated formal committees (Finance, Trustees) to transition from centralized authority to standardized, rule-based governance.
 - Directed \$75k in infrastructure improvements, including church-wide plumbing and paving projects; managed vendor quotes, budgets, and timelines to ensure technical specifications were met.
 - Spearheaded multi-channel outreach programs (community events, food assistance) and expanded childcare services by 21%, contributing to a 25% year-over-year increase in total revenue.
-

PROJECTS

FREELANCE TAX ESTIMATOR

This project provides a simple solution to a real-world issue faced by over 64 million people in the United States. This freelance tax estimator provides a way for individuals who work at freelance jobs to estimate their self-employment tax liability based on their income.

Source code may be found [here](#).

ITERATIVE TOWER OF HANOI SOLVER

This project provides an iterative solution to an ancient logic puzzle and demonstrates with absolute precision and in 30 seconds or less the optimal solution to the Tower of Hanoi problem for any number of disks up to 20.
